Since the dawn of time...

...the armies of Heaven and Hell
have waged an endless war.

Drawn to the conflict was the Charred Council, an entity bound by ancient laws to preserve order and balance.

It held that any great power, unchecked, threatened the very fabric of the universe.

In time, Heaven and Hell came to honor the council and its laws, for none were beyond the swift and terrible justice of the council's enforcers, a fearsome brotherhood known as the Four Horsemen.

Amid the turmoil, the first humans emerged. The council foretold that these weak, but cunning creatures would someday be integral to the balance.

Thus, a third kingdom was named – the kingdom of man.

By order of the council,
a truce was forged between
Heaven and Hell.

The great pact was bound by seven seals, to be broken at the appointed time when man's kingdom stood ready for the endwar – a battle that would bring balance and determine the ultimate fate of the three kingdoms...

War

The Horseman War has charged into countless battles astride his spectral steed Ruin, leaving a trail of blood and bones in his wake. His eyes and hair are as white as the chill he casts on angels and demons alike, for the fury of his massive sword is unmatched in combat. As unyielding as time itself, War is both honorable and savage.

When summoned to the Final War, the Horseman's task was to purge the Earth and bring the Kingdoms of Heaven and Hell into a new era. But he was betrayed, and his actions wrote the end to the chapter of man. I have heard that War now seeks his revenge. Surely, only the Horseman's wrath can burn away the pure evil of the Destroyer's reign.

Ruin is the legendary red steed of the Horseman War. When astride Ruin, War strikes harder, faster, and wider, his powers somehow magnified by the stallion beneath him. Ruin himself is a deadly opponent. I have seen Ruin burst from the earth in a cloud of smoke and slashing hooves then vanquish demons in cascades of swirling flame.

Like two suns, Ruin and War join to burn all the brighter. If they were to unite on the cursed planes of Earth, nothing could escape their blazing union.

The Charred Council

There is but one authority in the universe that cannot be questioned—the Charred Council. These three omniscient beings, bound by ancient laws, are charged with preserving the balance between Heaven, Hell, and the Kingdom of Man. To oppose the Council's edicts is to invite terrible retribution at the hands of its enforcers, the dreaded Four Horsemen.

The Council is not known for its mercy. I feel the shadow of the Horsemen looming over the world. We will all answer for the Destroyer's crimes, and "balance" will be measured out in blood and fire.

Vulgrim

Vulgrim's twisted mind spins with so many detestable schemes that I doubt he even trusts himself. Indeed, he has grown even more devious since mankind exhaled its last breath. If this wretched demon's business is collecting souls, his pleasure is devouring them.

Always ravenous, Vulgrim will beg, steal, or kill for souls. He has also been known to trade for them. A desperate warrior might find such a black bargain palatable. To find him, one need only seek Vulgrim's glyphs, burned into the ground beneath demon haunts and the broken shells of buildings.

SKETCH

The Watcher

CG TURNAROUNDS

The Charred Council is not averse to evil. If anything, they embrace it as part of the balance they're sworn to protect. The Watcher is a troubling example of such tolerance. Spiteful, fast-talking, and cruel, he is one of the Council's most trusted servants.

The Watcher delights in the suffering of others. Empowered by the Council, he flagrantly tortures and humiliates his charges, dripping poisonous insults and sarcasm onto their prostrate forms. I long for the day when the Watcher's leash is broken and his cruelty is repaid in kind.

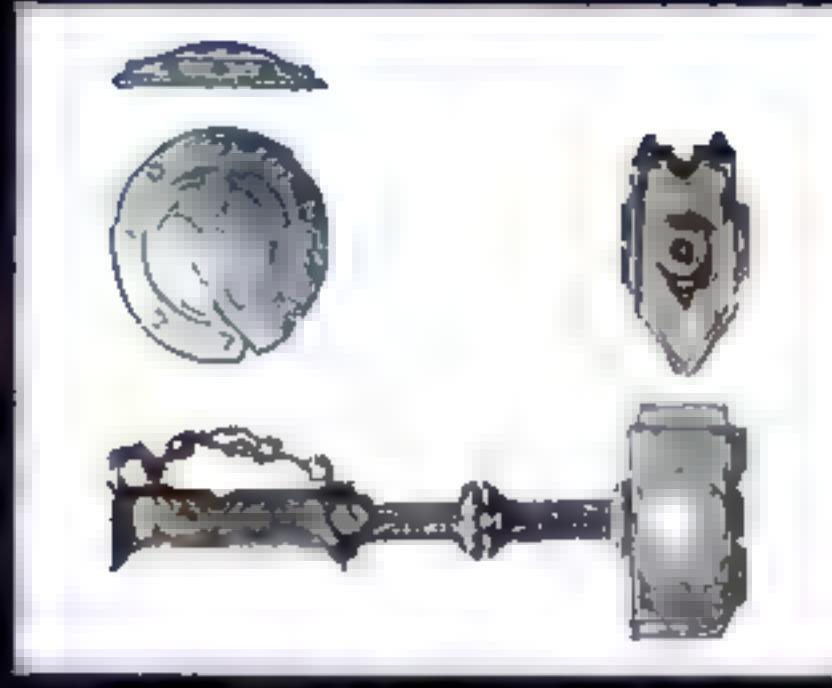

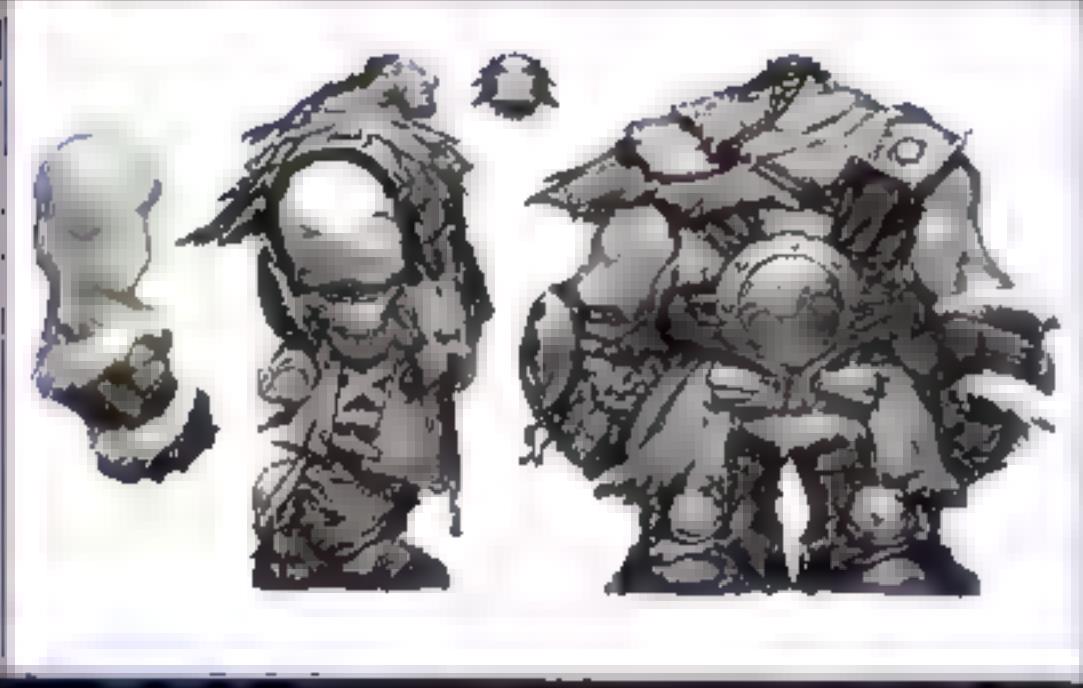

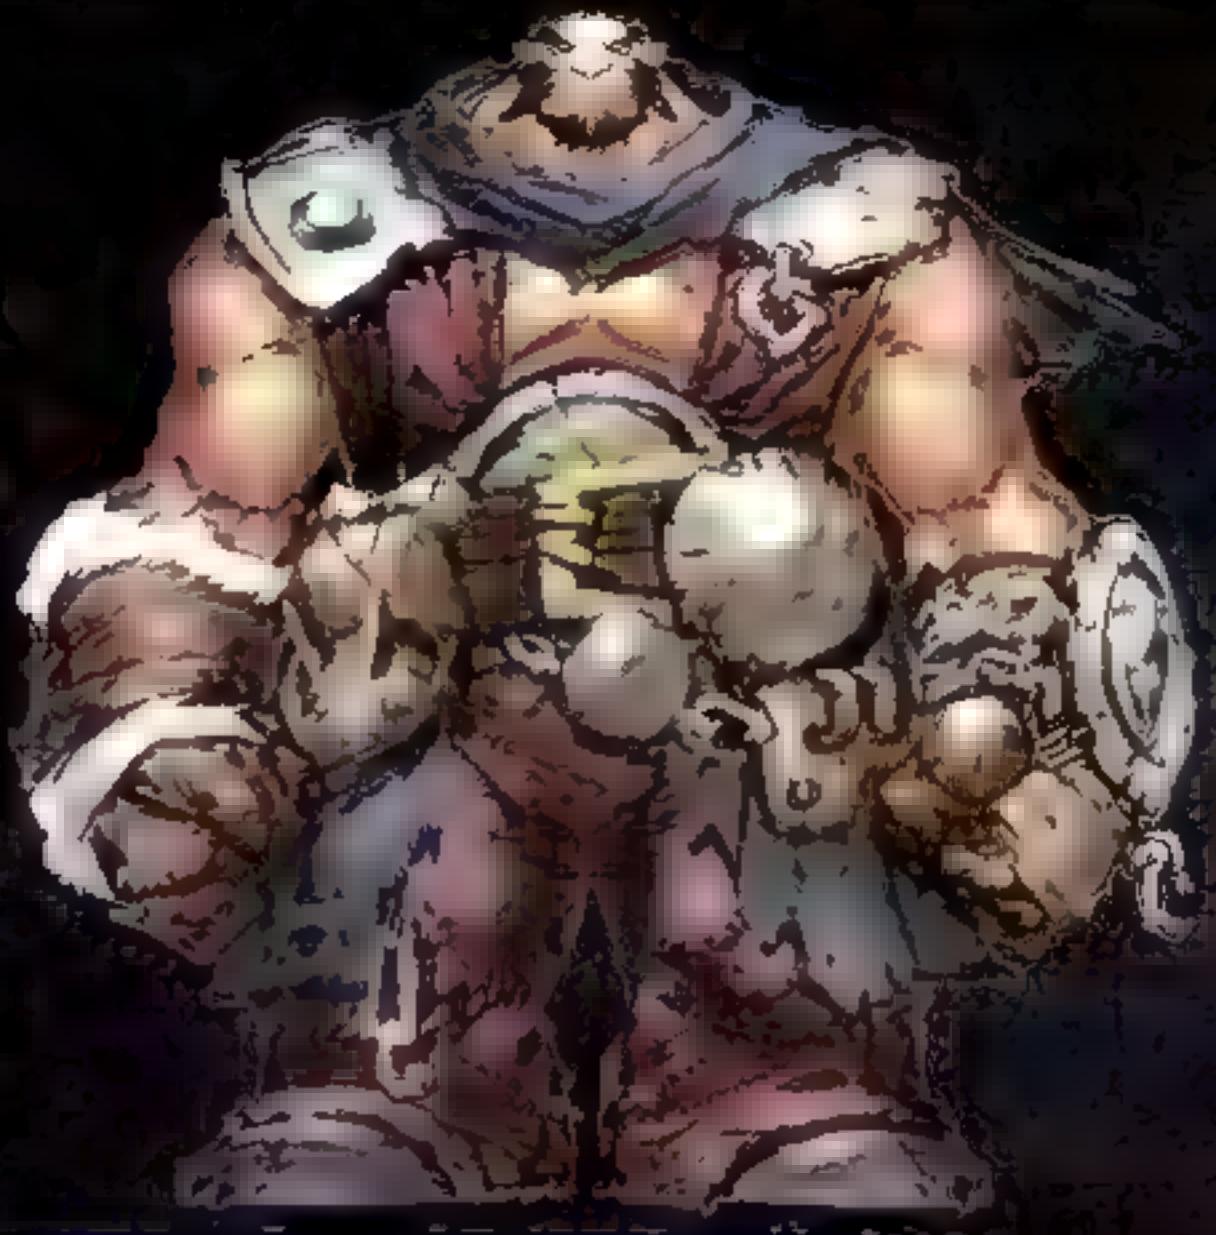

SKETCH

CHARAGGERS

Ulthane

Ulthane is an Old One with a unique perspective on the endless machinations of Heaven and Hell—they don't concern him one bit. He greets demons and angels alike with a wink, a merry whistle, and the business end of his black hammer. Through the dark lens of his twisted humor, all is a lark.

The only thing Ulthane takes seriously is the shaping of steel. Among the ranks of legendary weapon-makers, he is unmatched. I have held the Great Smith's craftsmanship myself, his own strength manifest in every line and curve—a sword that could kill a god. The Destroyer will not allow such a weapon to be forged again.

WEAPONS

Abaddon

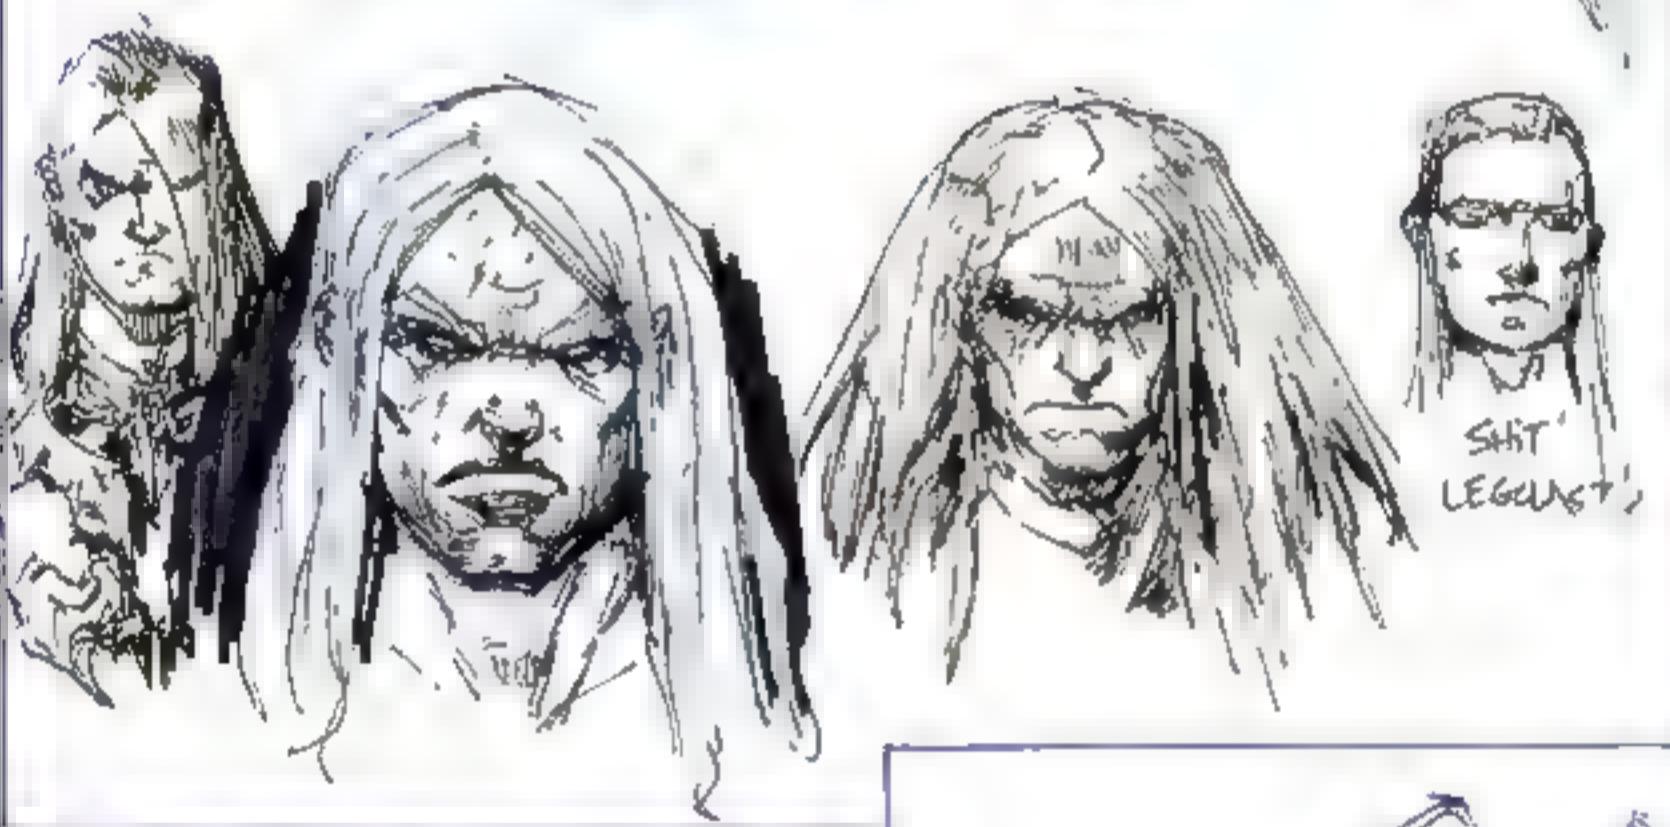

The archangel Abaddon was once a valiant warrior of the Light, feared by Hell's minions and respected by the angels who served under him. His fierce determination to rid the world of infernal corruption was as strong as any weapon. But in the heat of battle, even an iron will can be sundered.

Abaddon led the Heavenly Host into combat during the first desperate hours of the Apocalypse, slaughtering uncounted demons—until the Horseman War distracted him. An instant's hesitation was all that the demon Straga needed to crush Abaddon and drag him into the depths of Hell. The Army of Light has yet to recover from the shattering loss of their champion.

But no amount of demon blood will ever calm her anguished rage.

Countless corpses have been raised to bolster the Destroyer's army. But even more have risen on their own, fueled by the agony of their evil souls.

A great number of the Wicked roam this darkened world. Their clothes and skin have long since moldered to dust, exposing tendon, bone and the crusted scars of their death-wounds. Driven to madness by their eternal torment, these fiends will attack anything in their paths with the tenacity of jackals.

Undead

It is troubling that in the war between Heaven and Hell humanity found no escape—not even in death.

Animated by the Destroyer's power, the Undead corpses of man still creep across the Earth, their empty eye sockets burning with their master's will.

The Undead are relentless foes, as they sense neither pain nor fear. Projectile weapons do not seem to slow their drive to destroy. Indeed, these mindless slayers have been known to walk through a hail of gun fire just to get close to their prey. This is a most challenging enemy, for how might a warrior kill that which is already dead?

SHIELD LORD TURNAROUNDS

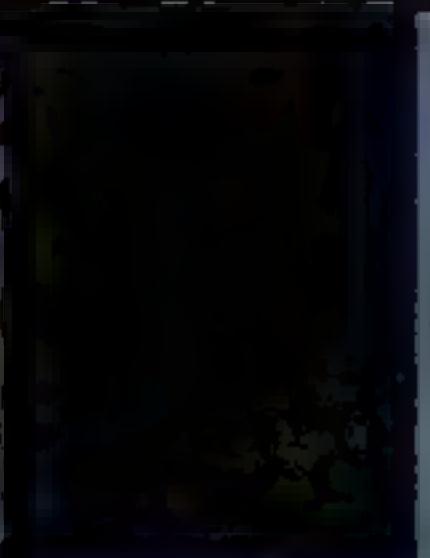

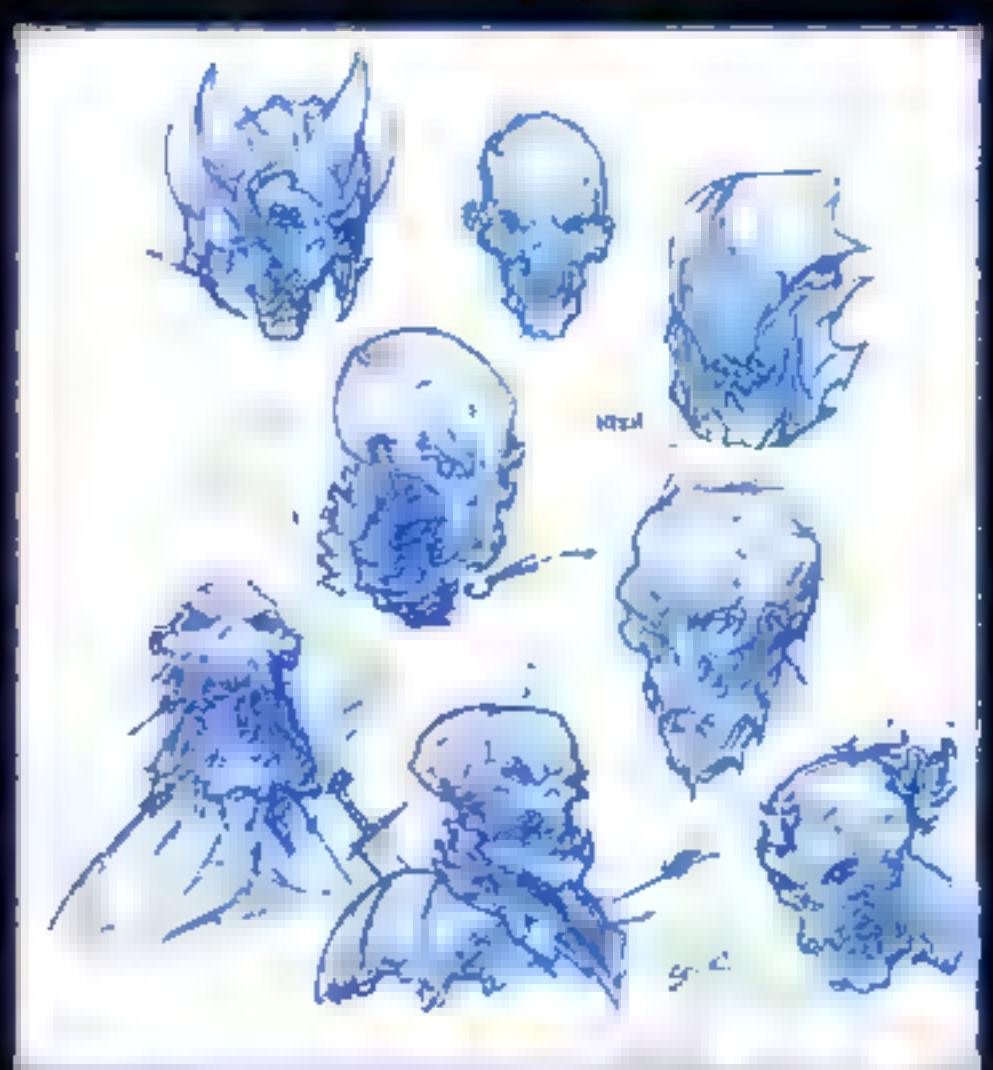

Undead Shield Lord

The Undead Shield Lords are among the most dangerous of the living corpses who serve the Destroyer. Their dark armor bristles with spikes and thorns. Their shields are razor-sharp, tapering down to a vicious point that the creatures seek to drive into their prey.

Hidden beneath such a shell, little about the Shield Lords seems human. Only the stench that follows them, that of soured blood and desecrated graves, hints at their unspeakable origin.

PLAGUEBEARER TURNAROUNDS

Undead Plaguebearer

The Destroyer has left the Earth a corrupted, diseased shadow of its former self. The Undead Plaguebearer is yet another manifestation of how twisted the world has become.

A toxic green haze oozes from the folds of the Undead Plaguebearer's skin. Anything caught within this noxious cloud of gas instantly begins to decay. Flesh putrefies and weapons lose their edge. Protected by this fetid mist, the Plaguebearers mount furious melee attacks. Only when stunned does this cloud dissipate, leaving the Plaguebearer vulnerable for a brief moment. The only sure defense against this relentless foe is to kill it—again.

From the greatest of Infernal Lords to the lowest of Wicked, Hell's legions still spread across the desolate Earth. The Phantom Guard form the backbone of the Destroyer's army.

They are hideous to behold, with craggy faces, stunted wings, and armor as jagged as their flesh. For years the Phantom Guard hunted the remains of mankind without pity. Now, these demons battle the valiant angels who patrol the scorched sky, and sate their bloodlust on those they bring to ground.

There is nothing subtle about the massive Gholens. The very ground trembles under their monstrous weight. Each hand is impossibly hard and smolders with fire that cannot be quenched. Gholens shake off blows that would fell trees, and crush skulls as if they were clay. When enraged, I have seen them rip up lengths of street and smash the ground to create mammoth concussion waves..

Trauma

There are many hellish creatures in the Destroyer's army, but few can match the savage strength of the Trauma. The chains that once bound them hang loosely from their hands and neck. The colossal beasts have mammoth claws on each hand that can shred steel as easily as flesh. I have seen them skewer cars and other debris from Man's reign to hurtle at passing angels. Their brutality is fearsome to behold.

Tormented Gate

The Tormented Gates are massive creatures that have been enslaved by the Destroyer. Their huge stone arms can fold into a massive rock wall, a trait the Destroyer has used to turn these gentle beasts into towering barricades. I have heard of a horn that can awaken these gates, but that relic has fallen into evil hands that will not part with it lightly.

TRANSFORMATION CONCEPTS

Duskwings

I have not seen the sun in over a hundred years. The sky itself is choked with ash and pestilence. And then there are the living clouds—the black and ravenous Duskwings.

Hovering on tattered wings, Duskwings are forever in search of carnage. With claws, fangs, and fury they render their victims a bloody smear. Even the rusting hulks of Man's wheeled machines are but toys to them. These vile creatures live only to kill, and their numbers seem to have no end—Duskwing eggs are scattered wide across the ruined city.

I fear the sun may never shine again.

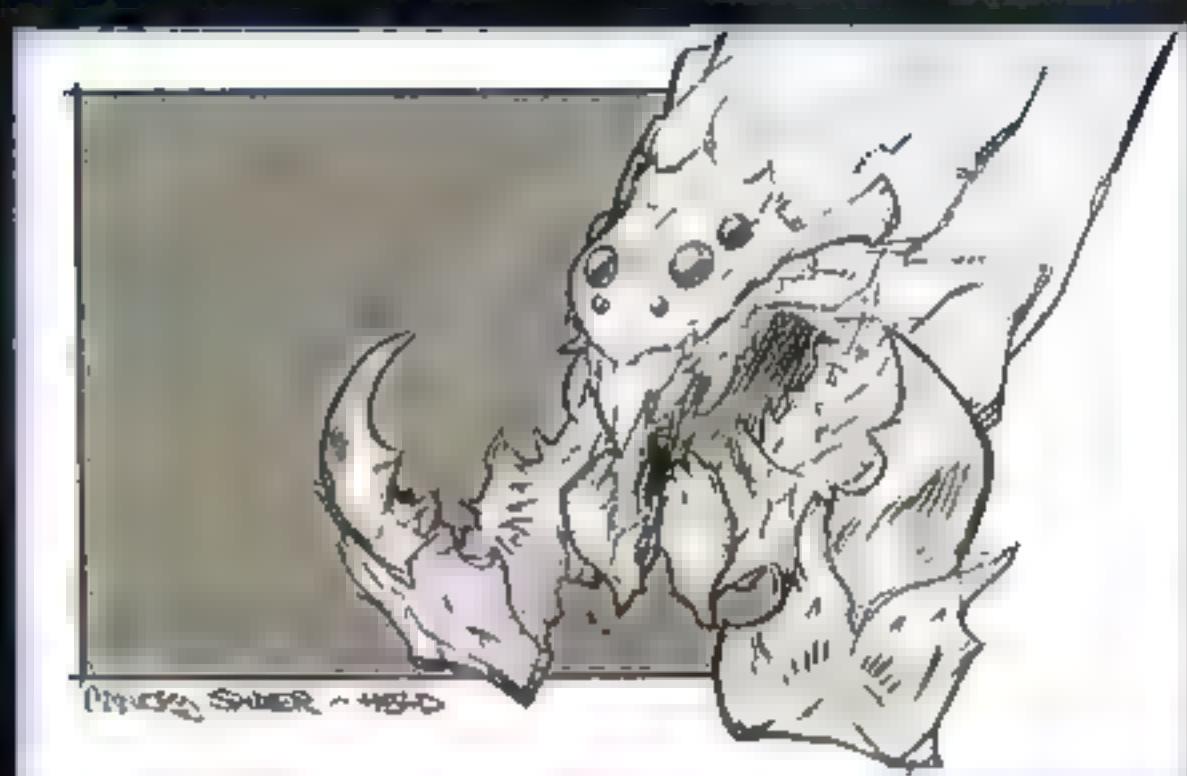

Broodlings

Silitha's Loom is a maze of web and fire-husked buildings, so silent that the patter of crumbling concrete echoes for miles. But these ruins are not unoccupied.

Hidden throughout the moldering towers are birthing sacs, globular growths that pulse with life. When the sacs burst, Broodlings are strewn onto the ground. These spiny-backed monsters know only ravenous hunger. They engulf any living thing that intrudes on the Loom. In seconds, their vicious mandibles can pick a victim's bones clean. With each passing day the swarm grows ever larger.

Chaoseater is a sword unlike any other. This unforgiving weapon has slaughtered countless enemies, their fate foretold by the death-masks artfully etched along its massive blade. And many a battle has been decided by Chaoseater's viciously honed edge, which can slice through the thickest demon bone as if it were candle wax.

As with most ancient arcane weapons, Chaoseater's true power can only be unleashed by a master equal to its blood-stained legend. Such a master is the Horseman War. Even after centuries of torment, I tremble to think that War's grim face and upraised sword could be the last things I ever see.

It is a cluster of four blades that can be thrown with brutal force.

After arcing deep into flesh, the Crossblade returns to its wielder's hand, ready to be thrown again.

And if that were not enough, the weapon carries an additional, malevolent secret. The Crossblade can absorb the properties of certain elements it passes through—such as fire and plague—and translate them into further mutilation. Even the mightiest of the Dark One's legions would dread a warrior who brandished a weapon of such devastating power.

DEVELOPMENT SKETCHES

Earthcaller

There is a realm hidden behind our own, where shadows twist to conceal relics of unimaginable power, sequestered from the physical world. The Mask of Shadow allows one to peer into this domain, and to acquire the artifacts and power shrouded within.

But beware. The Destroyer's kingdom may extend even to this unknown dimension. And wherever demons are found, even darker things lurk just out of sight.

MASK CONCEPTS

CONCEPT DESIGN

Metey

On the battlefields of the ruined Earth, the pistol known as Metey would seem modest. With four barrels ornamented by simple depictions of smoke and flame, it is easily dwarfed by weapons wielded by angels and demons alike. Yet it is far deadlier than any firearm I have seen.

Metey generates its own supply of lethal bullets. The rate of fire is defined only by how quickly its master can pull the trigger. In skilled hands, the gun's endless fusillade of bullets can cut down an entire enemy regiment. Although this weapon has yet to surface on Earth, I feel it, somewhere, close at hand.

WEAPONS

GAUNTLET CONCEPTS

Tremor Gauntlet

Among the relics lost beneath the earth, the Tremor Gauntlet is uniquely frightening. It is an ancient glove lined with spikes, a glaring demon face etched onto its surface. The demon's eyes glowed with a single purpose—to amplify power. To possess the Tremor Gauntlet is to become the weapon.

For the Tremor Gauntlet's master, each finger has the fortitude to break enemies in half. Imagine armor imploding at the force of a blow, and massive barriers crumbling to dust. It is the stuff of demons' dreams. For the rest of us, let us hope it remains only in our nightmares.

Abyssal Chain

Death is not always a
cachophony of death.
Grief and armor-beating,
Sometimes it is a muffled
chink - a silent pause
and a sharp point through
the heart.

The Abyssal Chain is
supernatural gauntlet
forged to deliver such a
fate. It fires a spearhead
out of its engraved mouth
with blinding speed,
unspooling a chain behind
it. This chain can be
retracted to drag a dying
foe to an even fouler fate.
Or, it can pull the Hook
and its master skyward to
swing across the wastes.

DEVELOPMENT SKETCHES

Voidwalker

The Voidwalker does what no mere weapon can. It opens a hole in reality itself.

This arcane artifact seethes with energy which can be fired through the veil of the universe. When two such perforations are made, dimensional space curves back upon itself and Voidwalker's holes are connected. To step into one hole is to exit the other to a new location. Thus, the Voidwalker's master can weave his way through the byzantine wastes, to access every bloody hook and corpse-filled cranny.

Redemption

What angels lack in claws, teeth, and cruelty, they more than make up for with an arsenal of weaponry. Blazing with the radiance of the White City, Heaven's ordnance can burn away demons and their shadows.

Redemption is among the greatest of these weapons. More cannon than gun, it fires powerful rounds that punch holes of purifying fire into the dark sky. The spreading flame of each shot is perhaps the truest light now cast upon this Earth.

Fracture Cannon

Adi Mesika

It takes but one glance to understand the Fracture Cannon's terrible purpose. It is a ghoulish instrument of death, with a massive barrel, notched spikes, chains and a fiendish skull. The cannon fires obsidian bolts that tear through flesh like wet paper—and explode into greedy flame. Even at range, the rolling thunder of each shot can shatter armor as well as bone. It is a small mercy that few are strong enough to wield this immense weapon.
